PROFESSIONAL SUMMARY

Detail-oriented Data Analytics graduate with experience in SQL, Python, Power BI, and Azure-based data workflows. Proven ability to analyze complex datasets, improve reporting efficiency, and translate data into actionable business insights. Brings a strong foundation in administrative operations, technical support, and data-driven decision-making.

TECHNICAL SKILLS

Data & Analytics: SQL (PostgreSQL, MySQL), Python (Pandas, NumPy, Scikit-learn), Excel (Pivot Tables, VLOOKUP, Power Query), Power BI, Tableau

Cloud & Data Engineering: Azure Data Factory (Pipelines), Azure SQL Database, Data Integration, ETL Pipelines, Data Lake / Lakehouse Concepts

Analytics & Reporting: Data Cleaning, EDA, KPI Reporting, Dashboard Development, Predictive Modeling, Feature Engineering

Business & Tools: CRM Systems (Checkmate, Car-parts), Technical Documentation, Process Improvement, Data Entry & Validation

PROJECTS

Predictive Well Performance Analytics / Python, SQL, Power BI, Scikit-learn, Excel

2024–2025

- Compiled, cleaned, and structured large-scale energy datasets (AER & Petrinex) spanning decades of oil & gas production activity
- Conducted market-relevant analysis of well performance trends, identifying patterns in production, decline rates, and regional variation
- Built a predictive classification model to categorize wells by performance risk, supporting early identification of underperforming assets
- Developed analytical outputs and dashboards in Power BI to communicate insights clearly to non-technical stakeholders
- Worked with complex datasets to answer practical industry questions related to performance, risk, and operational decision-making
- Enabled early identification of high-risk wells, supporting better operational decisions

PROFESSIONAL EXPERIENCE

Inventory Manager / Data Operator

Country Wide Auto Group — Calgary, AB | Nov 2024 – Present

- Managed and maintained 1,000+ records across CRM systems, ensuring data accuracy and consistency
- Generated weekly KPI reports and identified trends that improved inventory decision-making and reduced inefficiencies
- Identified and resolved data discrepancies, improving reporting efficiency by 20%
- Provided system and user support, assisting with technical and data-related issues

Radio Host & Technical Operator

RED 106.7 FM — Calgary, AB | Jan 2025 – Present

- Communicate complex topics clearly to diverse audiences, strengthening communication and presentation skills
- Operate and troubleshoot broadcasting systems during live sessions
- Handle real-time technical issues in high-pressure environments

EDUCATION

Southern Alberta Institute of Technology (SAIT)

Post-Graduate Diploma – Cybersecurity in Control Systems & Data Analytics

Murdoch University

Bachelor of Business Information Systems and Management– Information Technology

CERTIFICATIONS

Google Data Analytics Professional Certificate (v.3) – Google

ICS Cybersecurity Training (ICS 300) – Industrial Control Systems

Certificate of Completion: Tor and the Dark Web – Cybersecurity

Azure Data Engineering (End-to-End)
